Back then, Hoshino Resorts OMO7 Asahikawa, an urban tourist hotel where claims there's so much more to do than just sleep, announced "The Declaration of Ski City, Asahikawa" on September 27, 2018. As the second season starts in December 2019, "5 Services That Excite Skiers and Snowboarders" will be launched, including free shuttle services to Daisetsuzan Asahidake for hotel guests, and a "Wax Bar" where guests can choose snow waxes that match the snow quality and temperature. Hoshino Resorts OMO7 Asahikawa continues to challenge itself to support Asahikawa to become a ski city that put all skiers and snowboarders in the priority.

What is "The Declaration of Ski City, Asahikawa"?

Hoshino Resorts OMO7 Asahikawa announced "The Declaration of Ski City, Asahikawa" on September 27, 2018, with the goal of creating a ski city that puts skiers and snowboarders in the priority. Hoshino Resorts believes that there are two types of ski tourism. The first kind is when one stays at a ski resort, prioritizing access to the slopes while sacrificing after-ski activities. The second kind is where one needs to commute daily back and forth to the slopes, while able to enjoy enriching activities before and after skiing. When staying in a city, the price is more affordable when compared to a hotel near the ski area, and there are plenty of tourist attractions in the area, so guests can fully enjoy a longer trip with both skiing and sightseeing. Access to a wide variety of ski areas is possible from Asahikawa, and there are many restaurants in the city where guests can enjoy the taste of Hokkaido and its hidden gems. OMO7 Asahikawa believes that Asahikawa is exactly suited for ski trips in the city, so it will further challenge itself to become a ski city that puts skiers and snowboarders in the priority.

4 elements why Asahikawa is a ski city

1. Hold about 2,000 restaurants in the city center - "The charm of food after skiing".
2. A wide variation of choosing ski resorts.
3. Able to choose the ski area in the best condition according to the weather and snow quality of that day.
4. There are many tourist spots other than ski resorts that can be enjoyed even in bad weathers.

Last season, Hoshino Resorts OMO7 Asahikawa prepared a pick-up service that allows direct access to "Daisetsuzan Asahidake", "Kamui Ski Links", "Hoshino Resorts Tomamu Ski Area", and "Furano Ski Area", which are located in a zone called Japan's "powder belt." As a further challenge, "5 Services That Excite Skiers and Snowboarders" will start this season.
